

## Hard disk drive upgrade or replacement service for Sky plus digiboxes

Elstree-IT is now able to offer hard disk replacements for Sky plus digiboxes as follows:

Disk Size	Increase in recording time available over standard box	Installation charge (including disk drive)
500Gb	More than five times	£110
320Gb	Three times	£100
250Gb	More than twice	£93

Turnaround time is about eight working days from receipt of order.

For an additional fee of £30 we will attempt to copy your existing recordings to the new disk. However we cannot guarantee success of this process – it is possible that you may lose all your old programmes in which case you will not be charged the £30.

Payment is required in advance. Please remember to specify which size of disk you require at the time of placing your order.

***Please note that this procedure will invalidate any warranty that exists on your Sky Box so is only recommended for digiboxes that are out of their warranty period and do not have an extended warranty. Unfortunately we cannot offer any warranty on your sky digibox following this procedure, but the new disk comes with a 3-year manufacturers' warranty.***

***Please note also that it is normal to find that the larger disk causes the internal cooling fan to run much more often and for longer than previously.***

---
